Single space multimodule carport

CP1-I-S/V/4/MULTI

TYPE	MODULE DIRECTION	MODULE LAYOUT	SUPPORTS NO.	NO. / WIDTH (MAX) OF PV MODULES
Individual (I)	South (S)	Vertical (V)	Four	Customized

SEE ONLINE → 

DESCRIPTION

- Universal mounting system built with adjustable and densely perforated beams, allowing for the use of structures for modules of different power and size.
- A four-support system in the shape of the letter V.
- A multipart construction made of Magnelis™ steel, designed for various types of car ramps and parking lots - with the need for additional ballasting.
- The applied screw system for mounting beams, latches, and posts does not require servicing, provided that the installation is carried out in accordance with the instructions.
- Excellent for building small home installations up to 10 kW.
- In the case of multi-space carports, a modular system has been applied, allowing for the assembly and connection of an unlimited number of segments.
- There is an option to use a hybrid system, where the poles can be attached to ready-made ballast blocks placed directly on the ground in places where it is not possible to sink the blocks to the necessary depth.

© Upon the customer's request, every structure intended for production can be analyzed by our Technical Department regarding its installation in a specified wind and snow zone, as well as based on previously examined geotechnical conditions.

© The structure is designed for wind and snow zones specified as W1S2. To initiate production, a prepayment is required, the amount of which is specified in the offer.

- 1. Leg/support 1
- 2. Leg/support 2
- 3. Base of the construction
- 4. Leg/support 3
- 5. Latch
- 6. Purlin
- 7. Leg/support 4

**CHARACTERISTICS**

**CP1-I-S/V/4/MULTI**

Type of substrate	Ground
Type of construction and installation method	Carport (CP), mounted to a prefabricated foundation using chemical anchors
Type of construction	Individual (I)
Module orientation	South (S)
Module layout	Vertical (V)
Number of PV modules:	Customized
Type of modules	Standard/Bifacial
Shape of the column	V-shaped
Does the construction require additional ballast?	No
Is it possible to use a hybrid solution (piling + ballast)?	No
Minimum number of modules on the construction	Customized
Height of standard clamps (mm)	35
Thickness of standard clamps (mm)	5
Maximum length of the PV module (mm)	-
Standard inclination	15°
Distribution method	Individual order

**LIST OF PARTS - BASE OF CONSTRUCTION**

End clamp  
35
